

Rony El Wetter

roniweter@gmail.com | +961-71644187

A motivated and highly skilled Full Stack Developer with a strong proficiency in web development frameworks, multiple programming languages, as well as database design and management. Proven ability in team collaboration to define project requirements, develop technical solutions, and deliver products on time. Dedicated to continuous learning and staying up to date with emerging web technologies and best practices. Eager to contribute my skills and expertise to a dynamic organization that values personal growth and fosters a collaborative environment.

WORK EXPERIENCE

eMcREY

Jun 2024 – Present

Front End Developer

Riyadh, KSA

- Developed a banking project using Angular 16, utilizing advanced features such as RxJS observables and operators for asynchronous data handling and NgRx for state management. Implemented CanActivate guards to enforce authentication and authorization rules for secured routes and resources.
- Collaborated with backend developers to design and consume RESTful APIs, defining contract specifications and data formats for seamless integration between the front-end and backend systems. Utilized tools such as Swagger/OpenAPI for API documentation and testing.

Valoores, Soft Solutions

March 2022 – May 2024

Full Stack Developer

Front-End

Baouchrieh, Lebanon

- Developed responsive web applications using Angular 13, ensuring compatibility with various devices and screen sizes.
- Implemented dynamic user interfaces with real-time data updates, enhancing the overall user experience. (using libraries such as Angular Material, Bootstrap, font Awesome, PrimeNG, ngx-translate,...)
- Collaborated with the teams to gather project requirements, design application architecture, and deliver high-quality codes.
- Worked on onboarding KYC Wizard, responsible for designing the UI with dynamic fields generated from backend into the fields that are dynamically configured from the database in addition to API calls with the backend team.
- Worked on reusable components to be used by developers and other stakeholders to prepare and build business applications.

Back-End

- Developed and maintained full-stack applications using Java and Spring Boot, ensuring high performance and scalability.
- Designed and implemented RESTful APIs, incorporating best practices for security and data integrity.
- Collaborated with cross-functional teams to gather project requirements, design application architecture, and deliver high-quality codes.

Database

- Developed and maintained SQL databases, ensuring data integrity and security.
- Created SQL procedures and triggers to automate data manipulation and enforce business rules.
- Managed SQL jobs for scheduling and automating routine database tasks, such as backups and data imports.
- Collaborated with teams to gather and analyze database requirements, ensuring efficient data handling.

Freelance

- Developed a banking project using Angular 17 for the front end, Spring Boot to create APIs, and Microsoft SQL Server for the database.
- Developed a car sales and inventory management application, featuring car listings with detailed images and information. Implemented functionality for users to add, update, or delete car listings, and provided administrative capabilities for managing user accounts. Utilized Angular 16 for the frontend, Node.js for the backend, and PostgreSQL for the database. Access the project at www.unionautosleasing.com

EDUCATION

Bachelor of Science: Computer Science

2017 – 2021

Lebanese University Faculty of Science, Tripoli - Lebanon

SKILLS

- **Angular**
- **Angular Material**
- **Html**
- **Cascading Style Sheets (CSS)**
- **JavaScript**
- **TypeScript**
- **NodeJs**
- **Java**
- **SpringBoot**
- **Web Services Api**
- **JSON**
- **Sql**
- **PL/SQL**
- **Swagger / Postman**

LANGUAGES

- **English : Fluent**
- **French : Intermediate**
- **Arabic : Native**
